

Theme 5 - Our Successes and Achievements

Results from Parent/Carer Questionnaire

In May 2019, parents and carers were invited to take part in a School Improvement Questionnaire. Feedback from all members of our school community is crucial in helping King's Park to know what we're doing well and what we can do to become even better.

88 families responded to the questionnaire and a summary of the results are contained in this leaflet.

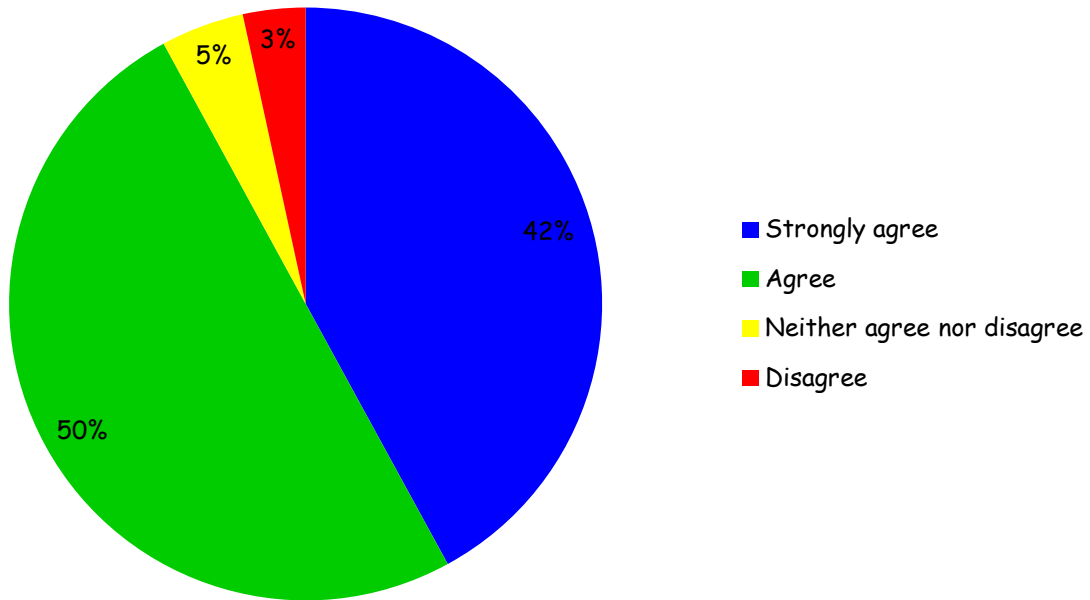

Respondents were asked how much they agree with a range of statements about how well King's Park supports all children to have opportunities to develop interests, skills and talents both within the classroom and beyond the classroom and school.

Parents and carers were also given the opportunity to comment on the strengths of the school and areas of improvement in this area.

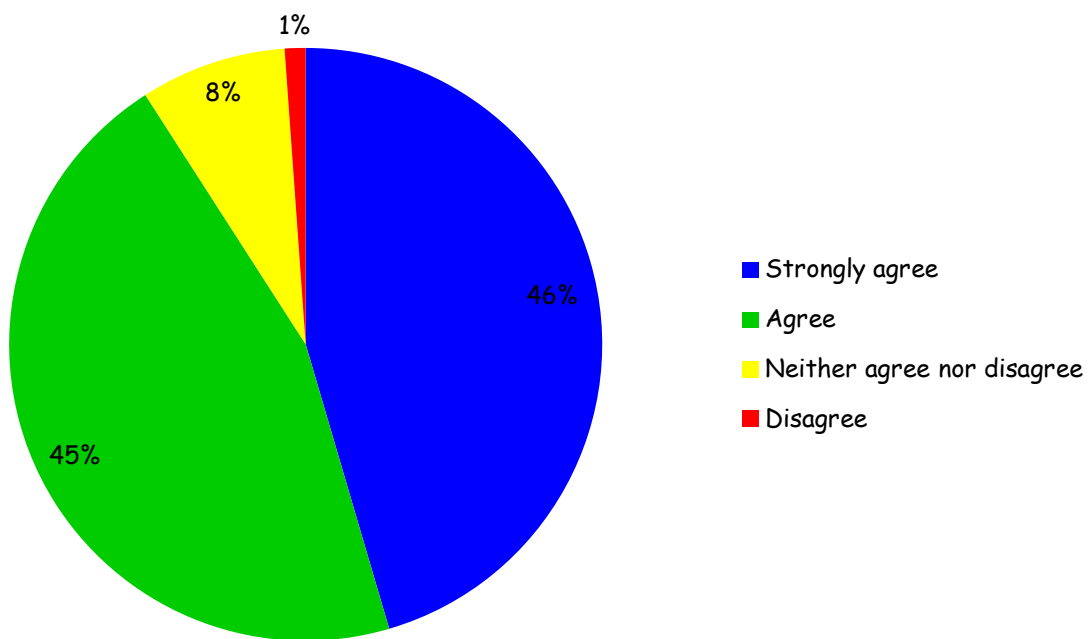

Thank you to everyone who participated in the questionnaire.

The information will be used to guide our work in the next school session.

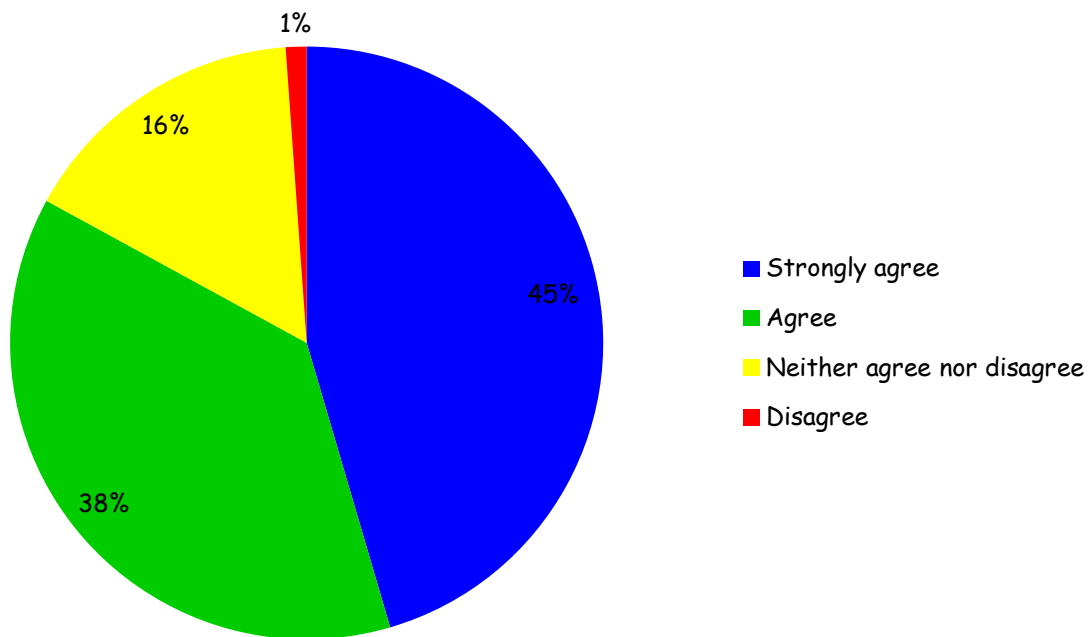

Everyone in our school has opportunities to be able to develop a variety of different interests, talents and learn new skills.

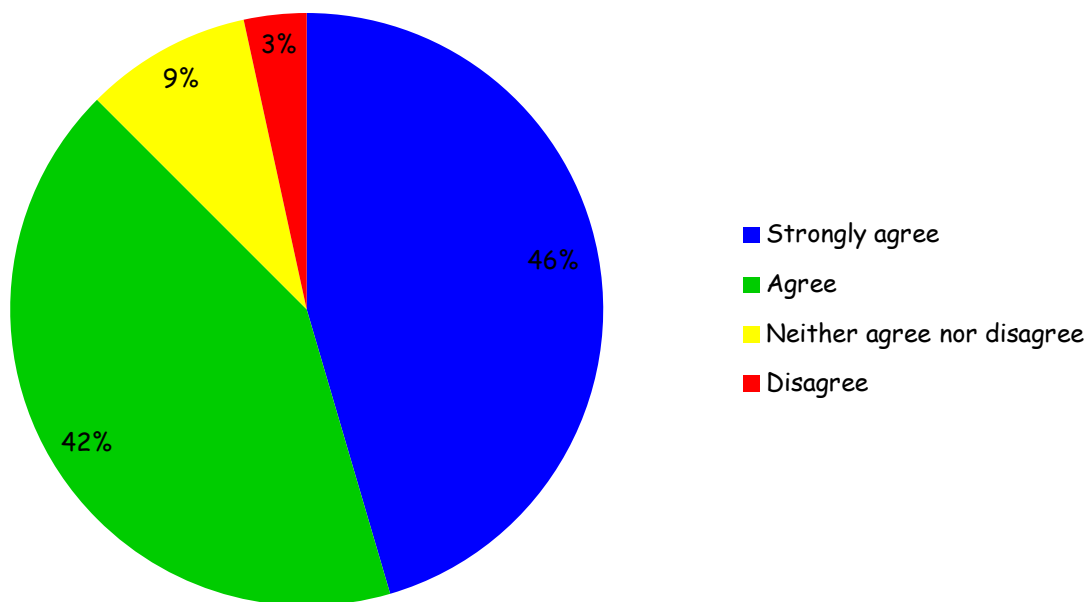

Staff encourage and support all learners to get involved in areas that are of interest to them.

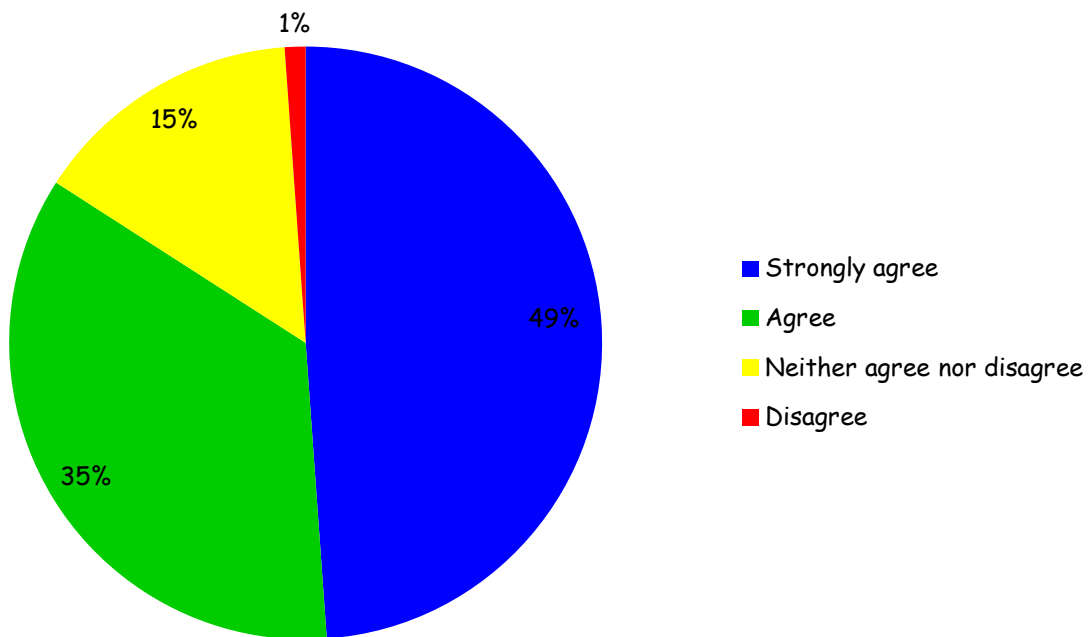

Staff help pupils overcome any barriers that might prevent them from taking part.

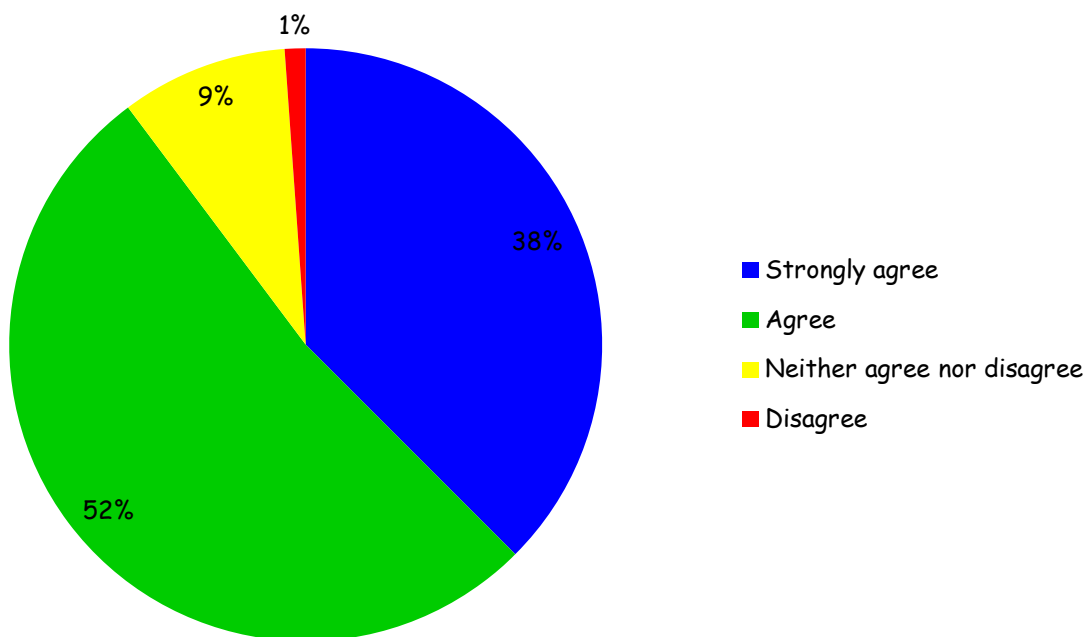

Every child in our school can take part in a group, club, team or activity beyond normal class time if they want to.

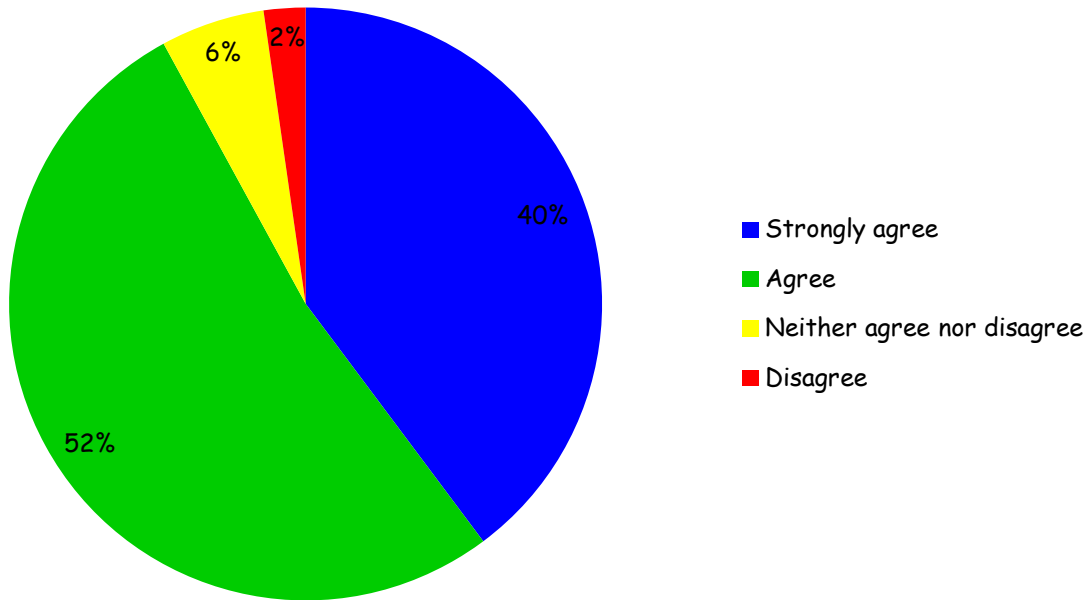

The school recognises and celebrates all pupil participation and achievements.

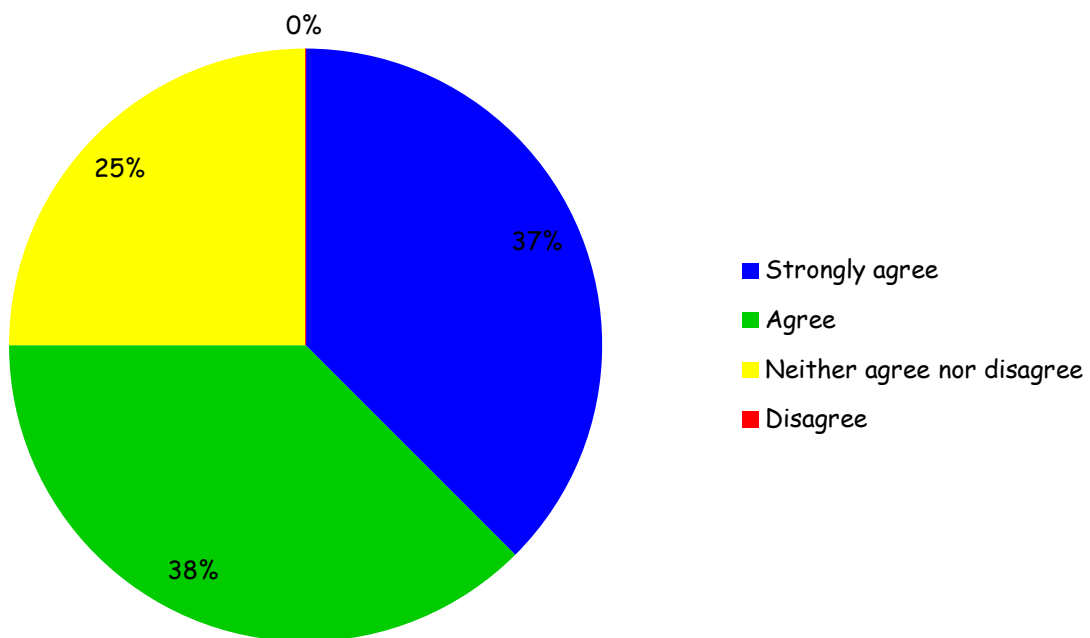

At all stages of school, learners have good opportunities to take responsibility through organising and leading activities.

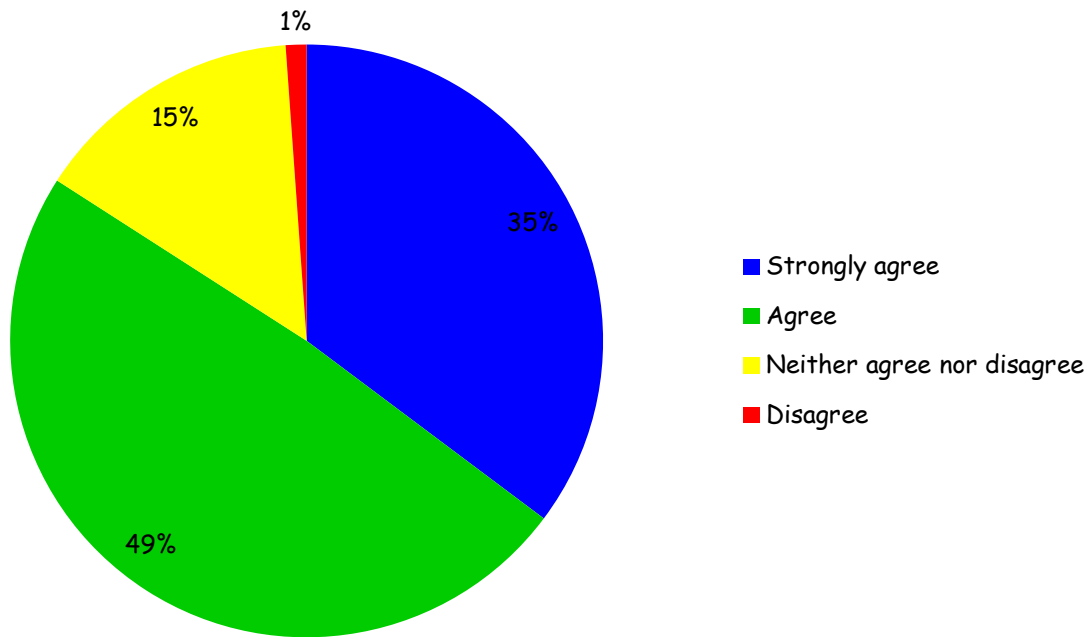

Pupils can talk confidently about the skills they are gaining as a result of leading and organising aspects of school life.

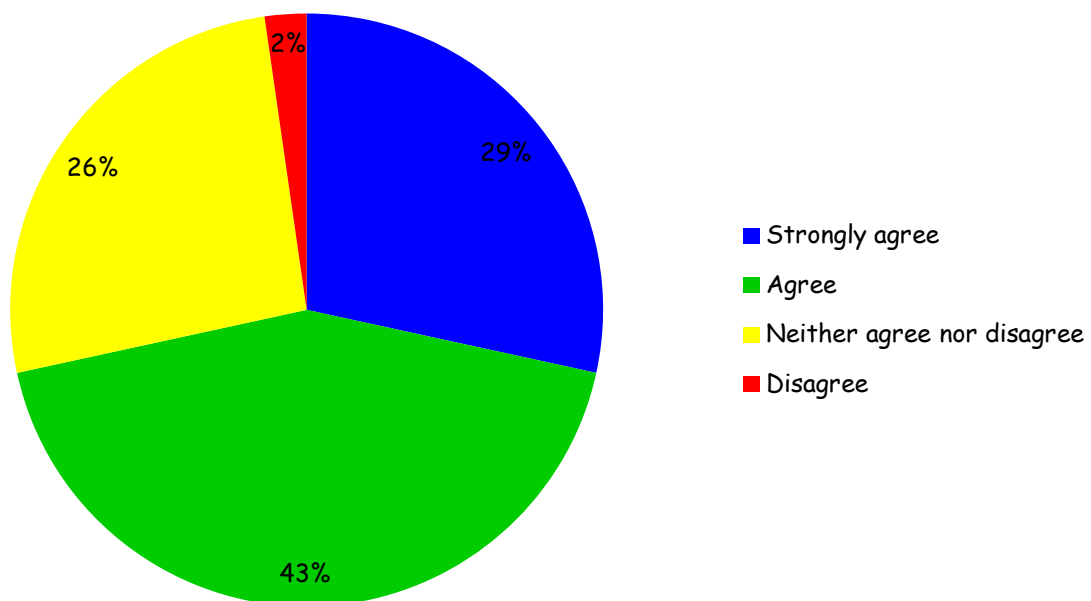

King's Park is helping its learners become more aware of the types of skills needed for different jobs in the future and why these are important.

The children are getting better at knowing when their skills are improving and being able to talk about this.

King's Park knows, and is interested in building on, the skills the pupils are learning out of school.

King's Park works with others, such as colleges and employers, to offer a wider range of experiences than the school can provide itself.
